Fall 2011

Programming Assignment – QualNet Simulation Due: 10/14/2011 (Friday) by 11:59pm

1 Overview

In this QualNet programming assignment, you will be doing the **five** QualNet simulation exercises described in <http://degas.cis.udel.edu/QualNet>. For Chapter 4 (Distance-Vector routing algorithm), please execute, trace, and understand the SRIP code so that you would learn how to write a new protocol (model) in QualNet.

2 Submission

You are required to submit answers (via an email to me) to the “Questions” given in these five chapters.
