

Demo Scheduling

Demonstrations

- Students will demonstrate their project to a TA in 132 Evans. Demo sessions will be 20mins for each group. (signups will be in lab)
- Students must be ready to demo at the start of their demo time, and prepared to show any/all required operations of the projects. Each student can be quizzed by the TA about any aspect of the project and graded accordingly (Make sure you know about EVERY part of your groups project!).
- Late demonstrations will be automatically deducted 20%. If students are unable to make their demo during their selected time without a medical or otherwise valid excuse, they may demo on Friday with the late penalty.
- Groups missing 1 student (unexcused) can still be demonstrated and graded on-time , but no leniency will be afforded to the remaining group member on the depth and breadth of the questioning. The unexcused student must makeup the full demonstration, with all penalties applied, by making an appointment with a TA.
