

How to Watch These Videos

What you invest into viewing these lectures is what you will get out of them

- You cannot learn by simply watching these videos like you are watching a movie
- You should
 - Frequently pause the video to
 - Review what is written on the slides, and
 - Think about what was said
 - Frequently replay a section of video
 - Take notes, perhaps on a copy of the slides
 - Keep the textbook (or several textbooks) handy to resolve questions as they arise
 - Develop and answer questions as you view and review the lectures
 - If you cannot find answers in the lectures or textbooks, check forums. If that fails, post a question on the forum and/or email Dr. Bohacek
 - What you invest into view lectures is what you will get out of them
