

General Instructions

I would like each team to prepare one slide to present in class every week that will discuss your progress (at least three bullets) on the project for that week. Every week you should reevaluate your question and make sure the progress you are making gets you closer to answering a specific question or hypothesis. At every class, each team will present their slide. The hypothesis or question you are trying to solve may not change, but the three bullet points should change from week to week showing new progress that you've made over the previous week.

Slide format

Question: ...

Progress

- 1) ...
- 2) ...
- 3) ...

Note: For 2/14, you should prepare one slide that describes the “General Problem” you are going to try to solve regarding your project, and two to three specific questions/hypothesis you are going to try to answer that go towards solving the general problem. Send me your slides by Monday (2/13) so that I can comment on them.
