

1. INTRODUCTION

Who are you and why you're here?
Keep it short and sweet.

12. CONTACT

Leave your contact details and let people know how to reach you quickly.

2. TEAM

Show the people behind the idea and briefly describe their role.

3. PROBLEM

What problem are you trying to solve?
Is it really a problem?

4. ADVANTAGES

What makes your solution special?
How are you different from others?

5. SOLUTION

Describe how are you planning to solve the problem.

6. PRODUCT

How does your product or service actually work? Show some examples.

7. TRACTION

Traction means having a measurable set of customers that serves to prove a potential.

8. MARKET

Know, or at least attempt to predict, the size of your target market.

9. COMPETITION

What are the alternative solutions to the problem you are trying to solve?

10. BUSINESS MODEL

How are you planning to make money? Show a schedule when you expect revenues to pour in.

11. INVESTING

What is your planned budget? What kind of money are you looking for?

The Leadership Team

CYBER 20/20

CYBER 20/20

Experience: Research and Development

John Cavazos, Ph.D. (CEO and Founder)

Current Associate Professor at University of Delaware
JP Morgan Faculty Fellow at Inst. For Financial Services Analytics

Experience: Execution Strategy

Jay Modi (COO)

Former CTO at Lockheed Martin
Senior positions at The SI Organization, CSC, and NASA

The Problem

- * Over 100K malware variants created every hour
- * Bad actors have embraced automation
- * Good actors still construct malware detection rules manually

The Product

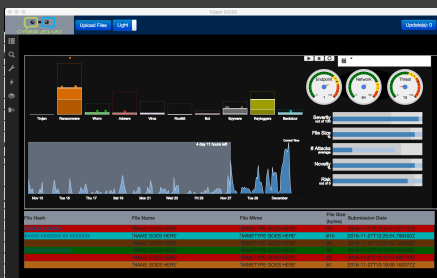

Cyber 20/20 is an all-software product consisting of:

1) a deep learning neural network in the cloud

2) a network tap used to extract and examine all binary files entering an enterprise

3) a web based user interface
