

# Course Syllabus ELEG662-010 Digital Systems Seminar, Fall 2022

*tentative*

## Instructor

Prof. Rudolf Eigenmann ([eigenman@udel.edu](mailto:eigenman@udel.edu))

## Instructional Approach

This is a seminar class with bi-weekly lectures and discussions by guest speakers, faculty and students on specialized topics in digital systems.

## Meeting Dates and Speakers

See Seminar schedule posted on Canvas ([udel.edu/canvas](http://udel.edu/canvas)) and also on the instructor's web page. There will be an orientation on the first class date, on 8/31. The orientation will be in person.

## Meeting Time and Location

The seminar class is on Wednesdays.

Starting time is 11:15am and duration is 1 hour.

We will have a mix of in-person and online talks. For in-person talks, you must be present at the seminar location, EVANS 204.

For online talks, use the zoom link <https://udel.zoom.us/j/4957131413>

Please show up at least 5 minutes before the talk begins.

## Grading Policy

The grade for this class is pass/fail and is based on attendance. An attendance poll will be taken by the instructor, or a delegate, *before* the start of class. You will not receive credit if you show up late (after the speaker introduction begins) or leave early (before 12:15 or the end of the talk, whichever is earlier), unless you have an excused absence.

For online seminars, you are considered present when your camera is on.

There will be approximately six speaker/seminar dates in the semester.

- If you attend four or more seminars - you will PASS.
- If you attend less than four seminars - you will FAIL.

Exceptions to the above policy require students to work with Assistant Dean Shermeyer to submit proof of extenuating circumstances, so that the Dean's office emails the instructor an official Excused Absence Notification.
