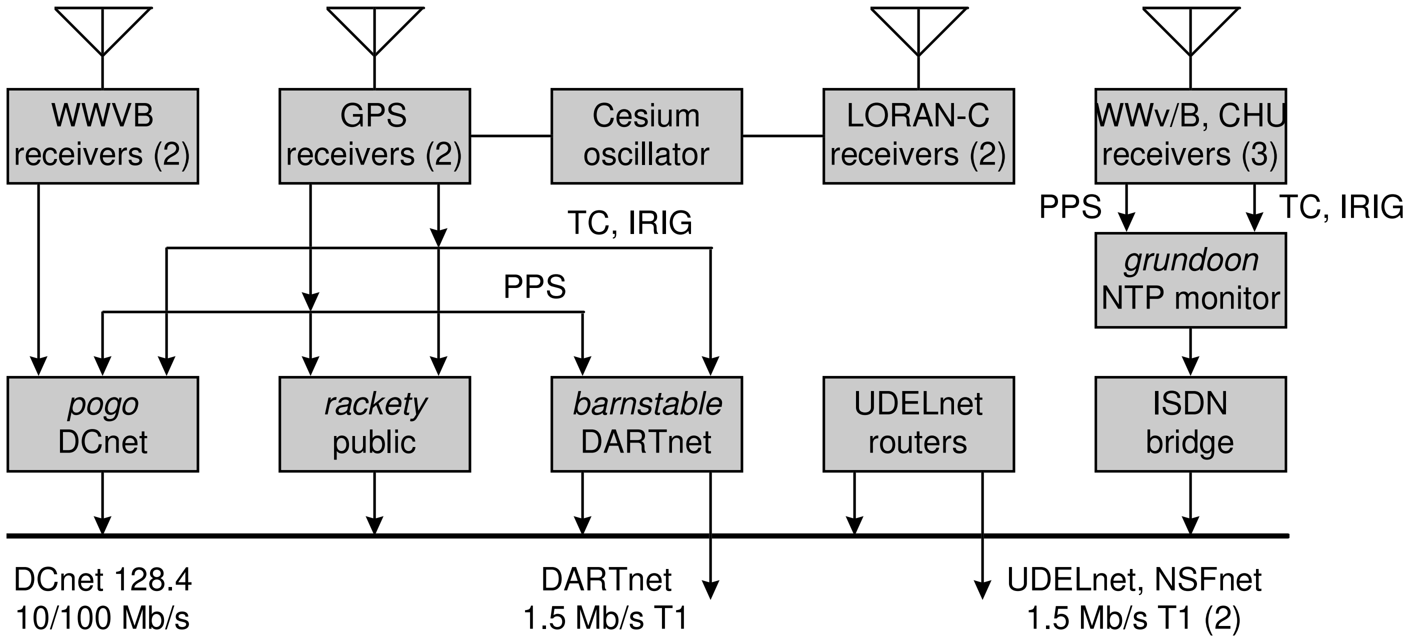
## Timekeeping facilities at UDel - March 1996



- Cesium oscillator is calibrated by U.S. Naval Observatory and checked continuously by Northeast US LORAN-C chain and GPS
- NTP primary time servers synchronize to timecode (TC), PPS and IRIG-B, all with kernel modifications for precision timekeeping
- NTP secondary servers (not shown) include VAX, SunOS 4/5, Ultrix 4, OSF/1, HP-UX, Cisco, Bancomm and Fuzzball (semi-retired)
