

Curriculum Vitae

B. David Saunders

Professor
Department of Computer and Information Sciences
University of Delaware
Newark, DE 19716

Professional History

- 1984-present Professor, Computer and Information Sciences Department, University of Delaware, Newark, Delaware
- 2012, spring Professeur Invité, ENS Lyon, France
- 2011, fall Visiting Professor, University of Waterloo, Waterloo, Ontario, Canada
- 2005-2010 Chair, Computer and Information Sciences Department, University of Delaware
- 2005, spring Visiting Professor, Université Joseph Fourier, Grenoble, France
- 2001 Ontario Research Chair in Computer Algebra, U Waterloo and U Western Ontario, Canada (3 months)
- 1997 Guest Professor, Institute for Experimental Mathematics, Universität Essen, Germany (2 months)
- 1990-1991 Visiting Mathematics and Computer Science Department, Drexel University, Philadelphia, Pennsylvania
- 1988-1989 Acting Chair, Computer and Information Sciences Department, University of Delaware.
- 1975-1985 Professor (Assistant, Associate), Rensselaer Polytechnic Institute, Troy, New York
- 1976, summer Visiting Scientist, Mathematics Research Center, University of Wisconsin, Madison, Wisconsin
- 1974 Mathematische Institut der Technischen Universität Munchen, Germany

Education

Graduate: University of Wisconsin, Ph.D. in Mathematics under Hans Schneider, 1975.

Research interests

Symbolic and exact matrix computations. Building a library, LinBox, for solution of large sparse linear systems over finite fields and for solution of rational and Diophantine linear algebra problems. Algorithms, languages, and data structures for symbolic mathematical computation. Algebraic computation in parallel and distributed computing environments,

Research Publications

Research Grants

NSF Grant CCF-1018063 “AF: Small: Collaborative Research: High Performance Exact Linear Algebra Kernels,” PI: Saunders, Co-PI David Wood, \$227,230, 15Aug2010 to 31July2014. Collaboration with NSF grants 1019966, George Yuhasz, Morehouse College, and 1016728, Jeremy R. Johnson, Drexel University.

“CITADel - CyberInfrastructure Technology Advancement for Delaware,” NSF ARI Grant OIA-0963399, PI: Saunders, Co-PIs: Barner, Sacher, Steiner, Initial PI: Swany, \$1,354,827.00 1Oct2010 to 30Sept2012.

“Symbolic-Numeric Linear Algebra Computation,” NSF Grant CCF-0830130, PI: Saunders, Co-PI Wood, \$149,999, 1Sept2008 to 31Aug2011.

NSF Grant CCF-0515197, REU supplements, \$6,500, 1Jun2007 to 30Sep2008 (summer of 07: funds Matthew Fendt), \$6,500, 1Jun2008 to 30Sep2009 (summer of 08: funds Matthew Fendt).

“DefCOM - Distributed Defense against DDoS Attacks” NSF CCF Grant, PI: Saunders (substitute for Mirkovic) \$179,130, 1Sep2005 to 28Feb2009.

“Integer Linear Algebra, LinBox Applications and Extensions,” NSF Grant CCF-0515197,

PI: Saunders, \$259,998, 1Aug2005 to 31Jul2008.

NSF Grant CCR-0112807, REU supplements, PI: Saunders, \$6,000, 1Jun2003 to 31Jun2004 (summer of 03: funds 1 undergrad assistants),
\$6,000, 1Jun2004 to 31Jun2005 (summer of 04: funds S&E Scholar Daniel Roche),
\$5,500, 1Jun2005 to 30Sep2006 (summer of 05: funds Daniel Roche),
\$5,500, 1Jun2006 to 30Sep2007 (summer of 06: funds Bryan Youse).
\$7,500, 1Jun20010 to 30Sep2012 (summer of 11: funds Matthew Wezowicz).
\$6,500, 1Jun20013 to 30Sep2014 (summer of 13: funds Alex Stachnik).

“ITR/ACS: Collaborative Research - Linbox: A generic Library for Black Box Linear Algebra,” NSF Grant CCR-0112807, (paired with proposals from NCSU, WashColl), PI: Saunders, Co-PI’s: Caviness, Xiang, \$170,200, 15Jul2001 to 30Jun2004.

NSF Grant CCR-0098284, REU supplement PI: Saunders \$5,500, 1Feb2002 to 31July2004 (Summer of 02: funds 1 undergrad assistants)

“Exact Computation in Sparse Linear Algebra,” NSF Grant CCR-0098284 CISE CCR Numeric, Symbolic and Geometric Computation Program, PI: Saunders \$254,993, 15Aug2001 to 31Jul2004

“Theory and Practice of Parallel Linear Algebra in Computer Algebra,” E. L. Kaltofen, A. W. Lobo, and B. D. Saunders, (paired with CNRS grant of Villard and Roch) Grant INT-9726763 of the NSF Western Europe Program, \$17,500, 1Apr98 to 31Mar01.

NSF Grant CCR-9712362, REU supplement, PI: Saunders \$10,500, 1June2001 to 31Aug2002 (Summer of 01: funds 2 undergrad assistants)

“Symbolic Linear Algebra Computations,” Grant CCR-9712362 of the NSF Numeric, Symbolic and Geometric Computation Program. \$180,885, 1Sept97 to 31Aug02.

“Acquisition of an Avalon-Beowulf Cluster and Development of Discipline Specific Parallel Research Tools” B.D. Saunders is a Co-investigator. Principal Investigator is William H. Matthaeus, Bartol Research Institute. NSF/MRI Grant ATM9977692, \$1,151,159, start date 10/1/99.

“Parallel and Distributed Computing: Systems and Application Development Infrastructure,” NSF Computing Systems, \$643,513, 7/1/97 to 6/30/98, Infrastructure grant to purchase high performance cluster, B.D. Saunders is an Affiliated Investigator. Principal Investigators are S. Carberry, G. Gao, E. Lloyd, L. Pollock.

“East Coast Computer Algebra Day,” B. F. Caviness and B. D. Saunders, NSF CCR-9505363 \$9900, 1/95 to 12/95.

“Systems and Algorithms for Parallel and Distributed Symbolic Algebraic Computation,” B. D. Saunders, (paired with contract of Char and Johnson at Drexel), NSF

CCR-9123666. \$221,228 for 3 years, 8/92 to 1/96.

Navy-ASEE Summer Faculty Research Program, \$12,000, 1990.

Navy-ASEE Summer Faculty Research Program, \$10,000, 1989.

“Parallel Scheduling of a Non Procedural Specification,” B. D. Saunders, substitute PI replacing Maya Gokhale, NSF grant CCR-8614219, 8/1987 to 1/1990.

“A Proposal for Computer Research Equipment,” (to purchase shared memory parallel computer) M. Gokhale and B. D. Saunders, NSF CISE Instrumentation program, grant CDA-8805353, \$99,730, 8/1988 to 1/1990.

“Algorithms and Systems for Symbolic and Algebraic Computation,” B. D. Saunders of UDel, E. L. Kaltofen and M. Krishnamoorthy of RPI, R. D. Jenks and B. M. Trager of IBM T. J. Watson Research Center, and D. Y. Y. Yun of SMU, sponsored by NSF Program on Industry/University Cooperation, \$54,984(UDel portion), 1986 to 1987.

“Algorithms and Systems for Symbolic and Algebraic Computation,” M. Krishnamoorthy and B. D. Saunders of RPI, R. D. Jenks and B. M. Trager of IBM T. J. Watson Research Center, and D. Y. Y. Yun of SMU, sponsored by NSF Program on Industry/University Cooperation, \$250,631(RPI portion), 1983 to 1985.

“Algorithms and Systems for Symbolic and Algebraic Computation,” B. F. Caviness and B. D. Saunders of RPI, R. D. Jenks and D. Y. Y. Yun of IBM T. J. Watson Research Center, sponsored by NSF Program on Industry/University Cooperation. \$239,389, 1979 to 1982.

“Research in Applied Mathematics and Numerical Analysis,” G. J. Habetler, E. H. Rogers, and B. D. Saunders, NSF sponsored, \$53,689, 1976 to 1978.

Prize

Computer Algebra Nederland Foundation prize (1000 EU) awarded June 2002 to Carl Devore and David Saunders for *Matrix of Rational Functions Rank Algorithms Analysis*.

Misc. Professional Activities

Tutorials Chair, ISSAC’13, Boston, MA, June, 2013.

Program Committee, PASCO’10, Grenoble, France, July, 2010.

Program Committee, ECCAD’08, Shepardstown WV, May 2008.

Program Committee, PASCO’07, London, Ontario, July, 2007.

Program Chair, ISSAC’06, Genoa, Italy, July, 2006.

Associate Editor, Journal of Symbolic Computation, 1998-2004.

SIGSAM Treasurer, term 7/1999 to 6/2003. SIGSAM is the ACM special interest group on Symbolic and Algebraic Manipulation.

ISSAC Steering Committee, 1997-2000. Purpose is to provide stability and experience in the running of the annual International Symposium on Symbolic and Algebraic Computation meetings.

Program Committee, ACA'03, Raleigh, July, 2003.

Organizing Committee, ISSAC'03, Philadelphia, July, 2003.

NSF CCR Numeric, Symbolic, & Geometric Computing program panelist Symbolic Computing program panelist, December 15, 1997. Research Initiation Award panelist, April 2, 1991.

Conference Chair, "East Coast Computer Algebra Day (ECCAD '95)," University of Delaware, April 8, 1995. Approximately 95 attendees, approximately 40 presentations (talks, posters, demos). NSF funded.
(and on Organizing Committee 1996, 1998).

Program Committee, First International Symposium on Parallel Symbolic Computation (PASCO'94), Linz, Austria, September 1994.

Program Committee, ISSAC'90, Tokyo, Japan, Aug 1990.

Organized "Minisymposium on Exact Computation in Linear Algebra" at the Second Siam Conference on Applied Linear Algebra at Raleigh, North Carolina, April 29-May 2, 1985.

Organized "Special Session on Symbolic Mathematical Manipulation on the Computer" at the American Mathematical Society Summer Meeting, Ann Arbor, Michigan, August 19-21, 1980 (15 speakers).

National Research Council Graduate Fellowship Evaluation Panelist (Applications of Mathematics), February, 1980, February, 1981, and February, 1982 (chairman).

SIGSAM Bulletin Editor, 1980 to 1983. SIGSAM is the Special Interest Group on Symbolic and Algebraic Manipulation of the Association for Computing Machinery.

Invited Talks

"Certificates and probabilistic verification", Laboratoire Jean Kuntzmann, Mathématiques Appliquées et Informatique, Université Joseph Fourier, Grenoble, June 14, 2012.

"Exact Linear Algebra in LinBox", Laboratoire de l'Informatique du Parallélisme, ENS de Lyon, Lyon, May 10, 2012.

“LinBox status report”, David Cheriton School of Computer Science, University of Waterloo, Waterloo, Ontario, Sept 16, 2011.

“Exact Linear Algebra”, ECCAD ’10, East Coast Computer Algebra Day, Atlanta, May 15, 2010 (one of three invited speakers).

“Computation of rank and Smith normal form”, BIRS (Banff International Research Station) workshop 09w5071, Invariants of Incidence Matrices, March 31, 2009.

“Linear Algebra Modulo Tiny Primes”, ACA’09, Applications of Computer Algebra, High Performance Computer Algebra Session, Montreal, June 24, 2009.

“On matrix rank modulo small primes”, AMS Special Session on Sage and Mathematical Research Using Open Source Software, Washington, DC, January 8, 2009.

“Linear Algebra”, MICA’08, Milestones in Computer Algebra, Stonehaven Bay, Tobago, May 1-3, 2008.

“The case for exact linear algebra computation”, NSF CDI workshop, Arlington, VA, Oct 30-21, 2007

“Symbolic mathematical computation, evolution or revolution?”, 2007-2008 USNA Midshipman-Faculty Colloquium, Naval Academy, Annapolis, MD, Sep 24, 2007.

“The case for exact linear algebra computation”, U. of Delaware Mathematics Department Colloquium, December 1, 2006.

“A hybrid algorithm for the inertia of a symmetric rational matrix” Atlas of Lie Groups and Representations Workshop, American Institute of Mathematics, Palo Alto, California, July 29, 2005.

“Engineered hybrid algorithms for exact linear algebra”, Seminar, Laboratoire de Modélisation et Calcul, Grenoble, France, June 16, 2005.

“A brief history of exact linear algebra”, Applied Mathematics Colloquium, U. Joseph Fourier, Grenoble, France, June 9, 2005.

“Engineered algorithms in Linear Algebra”, Ontario Research Center for Computer Algebra, U. Waterloo, Canada, November 12, 2004. Again at Computer Algebra Seminar, North Carolina State University, February, 2005.

Banquet speaker, ISSAC’01, London, Ontario, July 24, 2001.

Commencement address, Department of Computer Science graduation ceremony, May 28, 1999.

“On solving parametric linear systems”, Department of Applied Mathematics, University of Western Ontario, February 23, 1999.

Department of Computer Science, ETH, Zurich, May 25, 1998.

Universitaet Tuebingen, Fakultae fuer Informatik, Tuebingen, May 20, 1998.

Applied Math Seminar, U.S. Naval Academy Department of Mathematics, Annapolis, April 21, 1998.

“Approximately solving sparse linear systems precisely,” Kolloquium des Graduiertenkol-

legs, Institute for Experimental Mathematics, Essen Universität, June 24, 1997.

Six lecture series on algorithms for the computation of Smith Normal Forms and related topics, Institute for Experimental Mathematics, Essen, Germany, June-July 1997.

“Parametric Linear Systems, the Univariate Case,” 6th Conference of the International Linear Algebra Society, Chemnitz, Germany, August 15, 1996.

“Interconnections between Maple and other Languages,” Maple Retreat, Sparrow Lake, Ontario, June 15 1992.

“The Lee/Saunders sparse matrix version of Bareiss’ algorithm,” Maple Retreat, Sparrow Lake, Ontario, June 17, 1992.

Invited conference talk: “Fast elimination for sparse integral matrices”, Computational Linear Algebra in Algebraic and Related Problems, Essen, Germany, July 27 - Aug 1, 1992.

“Determinants of Polynomial Matrices: exploiting sparsity, pattern, parallelism,” Rensselaer Polytechnic Institute, January 9, 1992

“Towards a more realistic abstract model of parallel computation,” Drexel University, October 9, 1991.

“Adaptive Parallel Algebraic Computation Systems,” Drexel University, April 12, 1990.

“Probabilistic Algebraic Algorithms, How Much Randomness?” CAP ’90 (Computer Algebra and Parallelism Workshop), Cornell University, May 1990.

“Parallel Algebraic Computation, Experiences on a Shared Memory Machine,” Supercomputer Research Center (NSA), Bowie, MD, June 23, 1989.

“The Inverse Eigenvalue Problem for Real Symmetric Toeplitz Matrices: Consistency Conditions for the Eigenvectors,” with David Wood (presenter), Third SIAM Conference on Applied Linear Algebra, Madison WI, May 24, 1988.

“Extremely fast computation of matrix canonical forms,” Van Vleck Hall 25th Anniversary Celebration, U. of Wisconsin, May 21, 1988.

“How fast can we compute,” Invited Colloquium, Swarthmore College, Feb. 11, 1988.

“Randomized Parallel Computation of the Smith Normal Form,” EUROCAL ’87, Leipzig, DDR, June, 1987.

“Matrix Methods in Computer Algebra,” Invited Talk, Computers & Mathematics Conference, Stanford, Aug., 1986.

“Fast Parallel Algorithms for Similarity of Matrices,” SYMSAC ’86, Waterloo, Ontario,

July, 1986.

“Matrix Computations: External vs. Internal Approaches,” Computer Science Colloquium, RPI, Troy, NY, May 9, 1986.

Students

Abdelilah Kandri-Rody, *Effective Methods in the Theory of Polynomial Ideals*, RPI, 1984.

Nikolaos Glinos, *Operational Calculus Methods for the Closed Form Solution of Ordinary Differential Equations*, RPI, 1985.

Todd C. Torgersen, *Algebraic Techniques for Automatic Detection of Parallelism*, UDel 1989 (coadvisor - Maya Gokhale).

Andrew P. Wack, *Partitioning Dependency Graphs for Concurrent Execution: A parallel spreadsheet on a realistically modeled message passing environment*, UDel 1995.

Zhengdong Wan, *Computing the Smith Forms of Integer Matrices and Solving Related Problems*, UDel 2005.

Lab Participants: Matthew Wezowitz (REU undergrad cosupervised with Taufer 2011/12) Bryan Youse (current student), John May (postdoc 2006/7), Bruce Char (visiting professor, Feb, Mar 2007), David Wood (current senior collaborator)

PhD Committee memberships include of: Wei(UD), Riu(UD), Hixley(UD), Laskov(UD), Zoppetti(UD), Way(UD), Mellinger(UD Math), Capursi(UD Math), Dumas (Grenoble), Turner (NCSU), Chen(Waterloo), Meng(Drexel), Brice Boyer (2012, Grenoble, “rapporteur”, student of Dumas), Fan Wu (UD Math, ongoing, student of Xiang).

Habilitation committee (rapporteur) of Gilles Villard (Lyon).

REU supported Undergraduate research assistants: Richard Seagraves, Bradford Hovinen, Erich Schrag, Peter Steijn, Daniel Roche, Frank Bellamy, Bryan Youse, Matthew Fendt, Nicholas Messina, Matthew Wezowitz.

Courses Taught

Courses at University of Delaware include:

CISC 372 Parallel Programming,
CISC 475 Object Oriented Software Engineering,
CISC 440/640 Computer Graphics,
CISC 280 Program Development Techniques(Scheme),
CISC 320 Algorithms and Advanced Programming,
CISC 449/649 Parallel Computation for Applications,
CISC 267 Rapid Prototyping,
CISC 821 Algebraic Algorithms I,
CISC 822 Algebraic Algorithms, polynomials and matrices
CISC 181 Introduction to Computer Science II (C++),
CISC 220 Data Structures (C++, using STL),
CISC 829 Parallel Algebraic Computation,
CISC 829 Exact Matrix Computation,
CISC 849 Parallel Processing (with D. Nassimi),
CISC 603 Program Validation,
CISC 829 Parallel Complexity Theory,
CISC 621 Algorithm Design and Analysis,
CISC 106 Introduction to CS for Engineers (Fortran),
CISC 441 Heuristic Programming,
CISC 170 Introduction to CS (Modula-2).

Courses at Rensselaer Polytechnic Institute include:

Algebra (graduate & undergraduate, linear & abstract), Point Set Topology (graduate & undergraduate), Problem solving seminar - culminating in Putnam Exam. Calculus, Advanced programming, Systems programming (operating systems), Programming Languages, Data Structures, Intro to Computer Science (Pascal/Fortran).
