

CISC 275 – Spring '12

Lab 6 – Animation

Non-graded portions

Download Animation.java from the webpage and get it running. You will also need to download orc_forward_southeast.png and create the correct directory structure for the file (see code).

Ultimately you will need the other orc images (provided in the .zip).

Graded Exercise – On your own

Modify Animation.java:

- Keep orc from walking off screen
- “Turn around” (i.e. load new image) when hitting a wall.

See the TODO notes in the source file for suggestions.

Submit your modified Animation.java to Sakai.
